

**FOR IMMEDIATE RELEASE**

**GLC MEDICAL INC. TO PRESENT AT GLOBAL CONFERENCE  
15<sup>TH</sup> ANNUAL HEALTH & HUMANITARIAN CONFERENCE**

**EDMONTON, AB, October 12, 2023 - GLC Medical (GLCM) Inc.** a Canadian medical diagnostics company with a mission to transform the method of detecting pathogens, today announced that Dr. Ushula Tefashe, Chief Science Officer (CSO) will present as a keynote speaker at the 15<sup>th</sup> annual Health and Humanitarian Logistics Conference to be held November 21-22, 2023, in Nairobi, Kenya.

The event serves as an opportunity for practitioners, aid organizations, government representatives, innovators, academics, and others to learn and engage on challenges and opportunities relevant to today's health and humanitarian needs. GLCM will be presenting to a world audience to include WHO, Red Cross, CDC, UNICEF and other recognized humanitarian aid agencies focused to change the world.

GLC Medical (GLCM) Inc. has unveiled a game-changing solution that is set to revolutionize the diagnostic industry. GLCM has successfully developed a portable, highly accurate diagnostic biosensor platform capable of delivering test results in under one minute. This innovation not only revolutionizes the field of diagnostic testing but also significantly enhances our preparedness for pandemics, epidemics and outbreaks. With GLC Medical's pioneering technology, healthcare professionals and communities can respond swiftly to emerging infectious threats, leading to improved patient care, and ultimately achieving superior public health outcomes. The speed and precision of the *GLCM Biosensor Platform* are invaluable assets in the ongoing battle against infectious diseases, providing a much-needed boost to global healthcare capabilities.
